Adobe Photoshop, Corel Draw, Inkscape

OS

MS Windows, Linux, MacOSX

VCS/TRACKING

SVN, Git, GitHub, BitBucket, Redmine, Jira,
Confluence, Wikia, YouTrack

AUTOMATION

Gulp, Webpack, Grunt, Composer, NPM

OTHER

Well, there is a lot of things I've met in my life performing as developer or IT-specialist from 1999. Nowadays it's all about flexibility, experience, analytical mindset and technology stack.

Regarding internet technologies evolution i guess i have touched almost every sphere of web-development.

Starting my career I thought i'll be a programmer only, but i has been:

- * **Programmer:** PHP/JS/Angular/NodeJS Full Stack Development
- * **Template Designer:** Use modern templating practices using trending technologies
- * **UI/UX:** Developing user interfaces based on analytics data and usage: smart, simple and lightweight
- * **Design:** Developing key web-project design mockups from scratch with technical design elements.
- * **Corporate Identity and Branding:** From simple logo to fullweight style guide-book
- * **Application/Project planning/managing:** Creating application development guidelines, plans, milestones (BitBucket, Redmine, Jira, Confluence, GitHub,...)

So, probably you ask me: Who am I right now? ~~Cylon~~.

I feel comfortable developing myself as Frontend Developer. Obviously today it's era of JavaScript web applications and i guess that my experience will be useful at this kind.

I plan to learn React/React Native/Ember.js at near future.

I love challenges, optimize, and that feeling when you release your product.

Personally, i have thought that there is another way for myself in future: Android App Development. I want to know that. I see a lot of opportunities there but not sure that i have enough time for this right now. And ofcourse it's just a thoughts.

Btw, i love biking.

EXPERIENCE

FRONTEND/FULLSTACK DEVELOPER

DISTILLERY TECH, INC.

AUG 2016 - NOV 2016

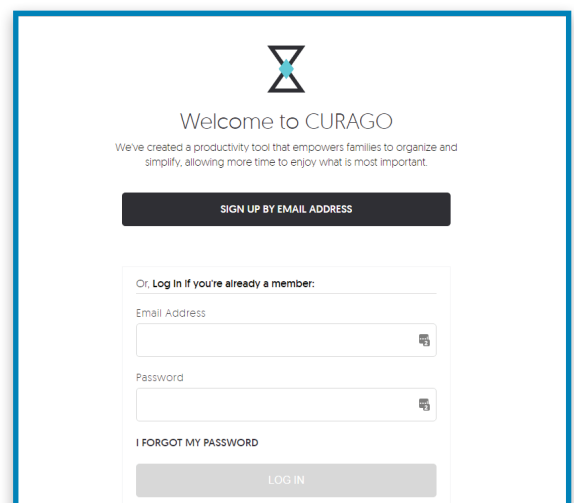

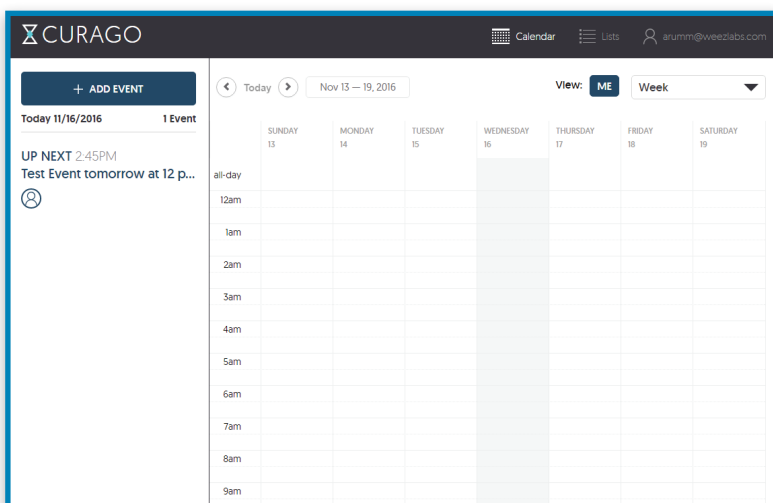

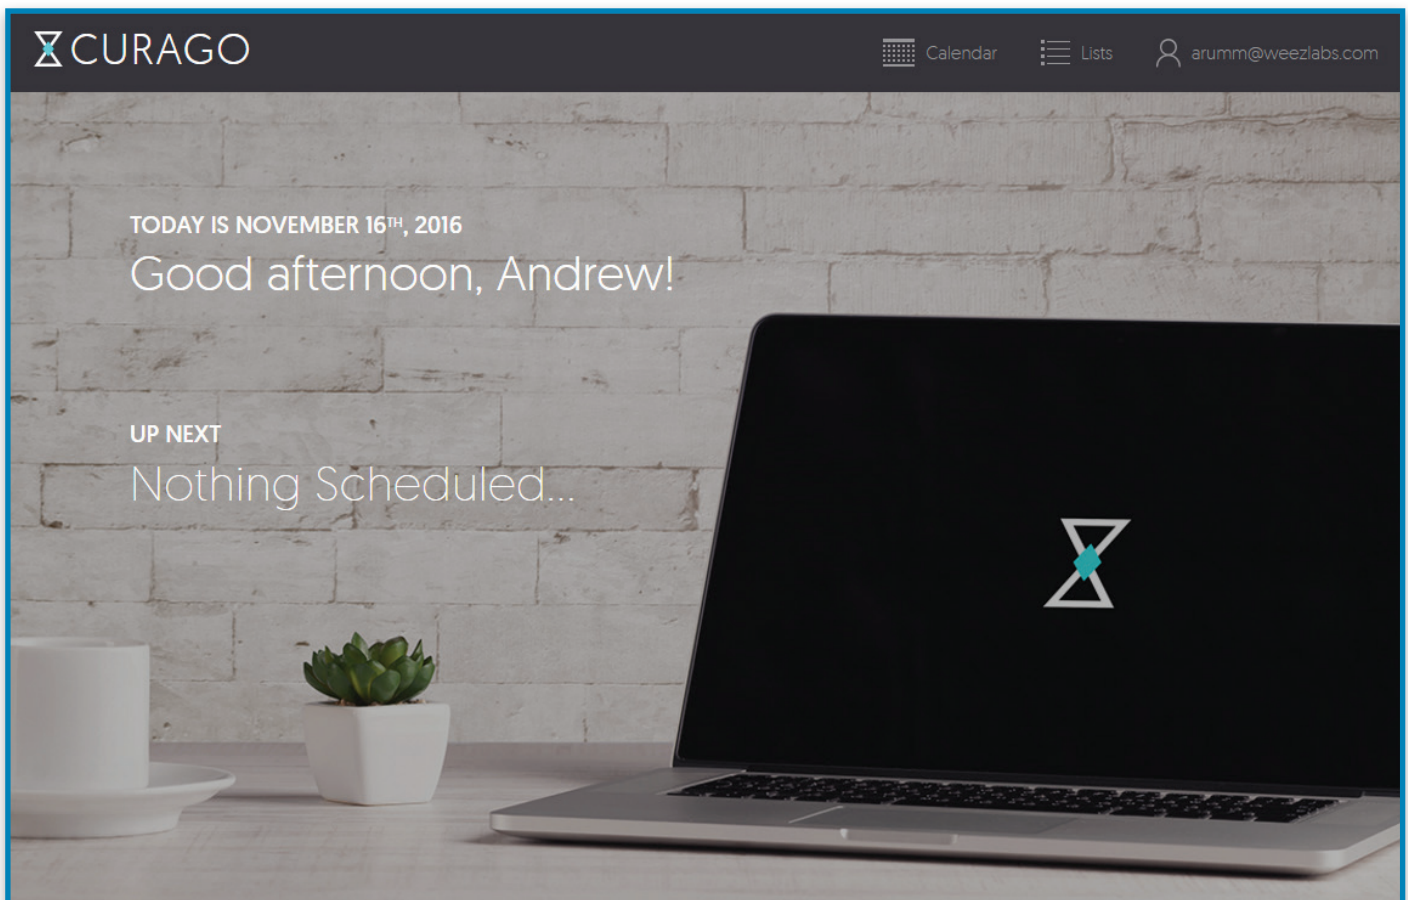

CURAGO

[HTTPS://CURAGOAPP.COM](https://curagoapp.com)

Web application scheduling family events and sharing pictures and other files.

Technologies used: AngularJS, ES6, ESLint, Gulp, Webpack, LESS

Key responsibilities: Create AngularJS components, templates, controllers, services, etc.

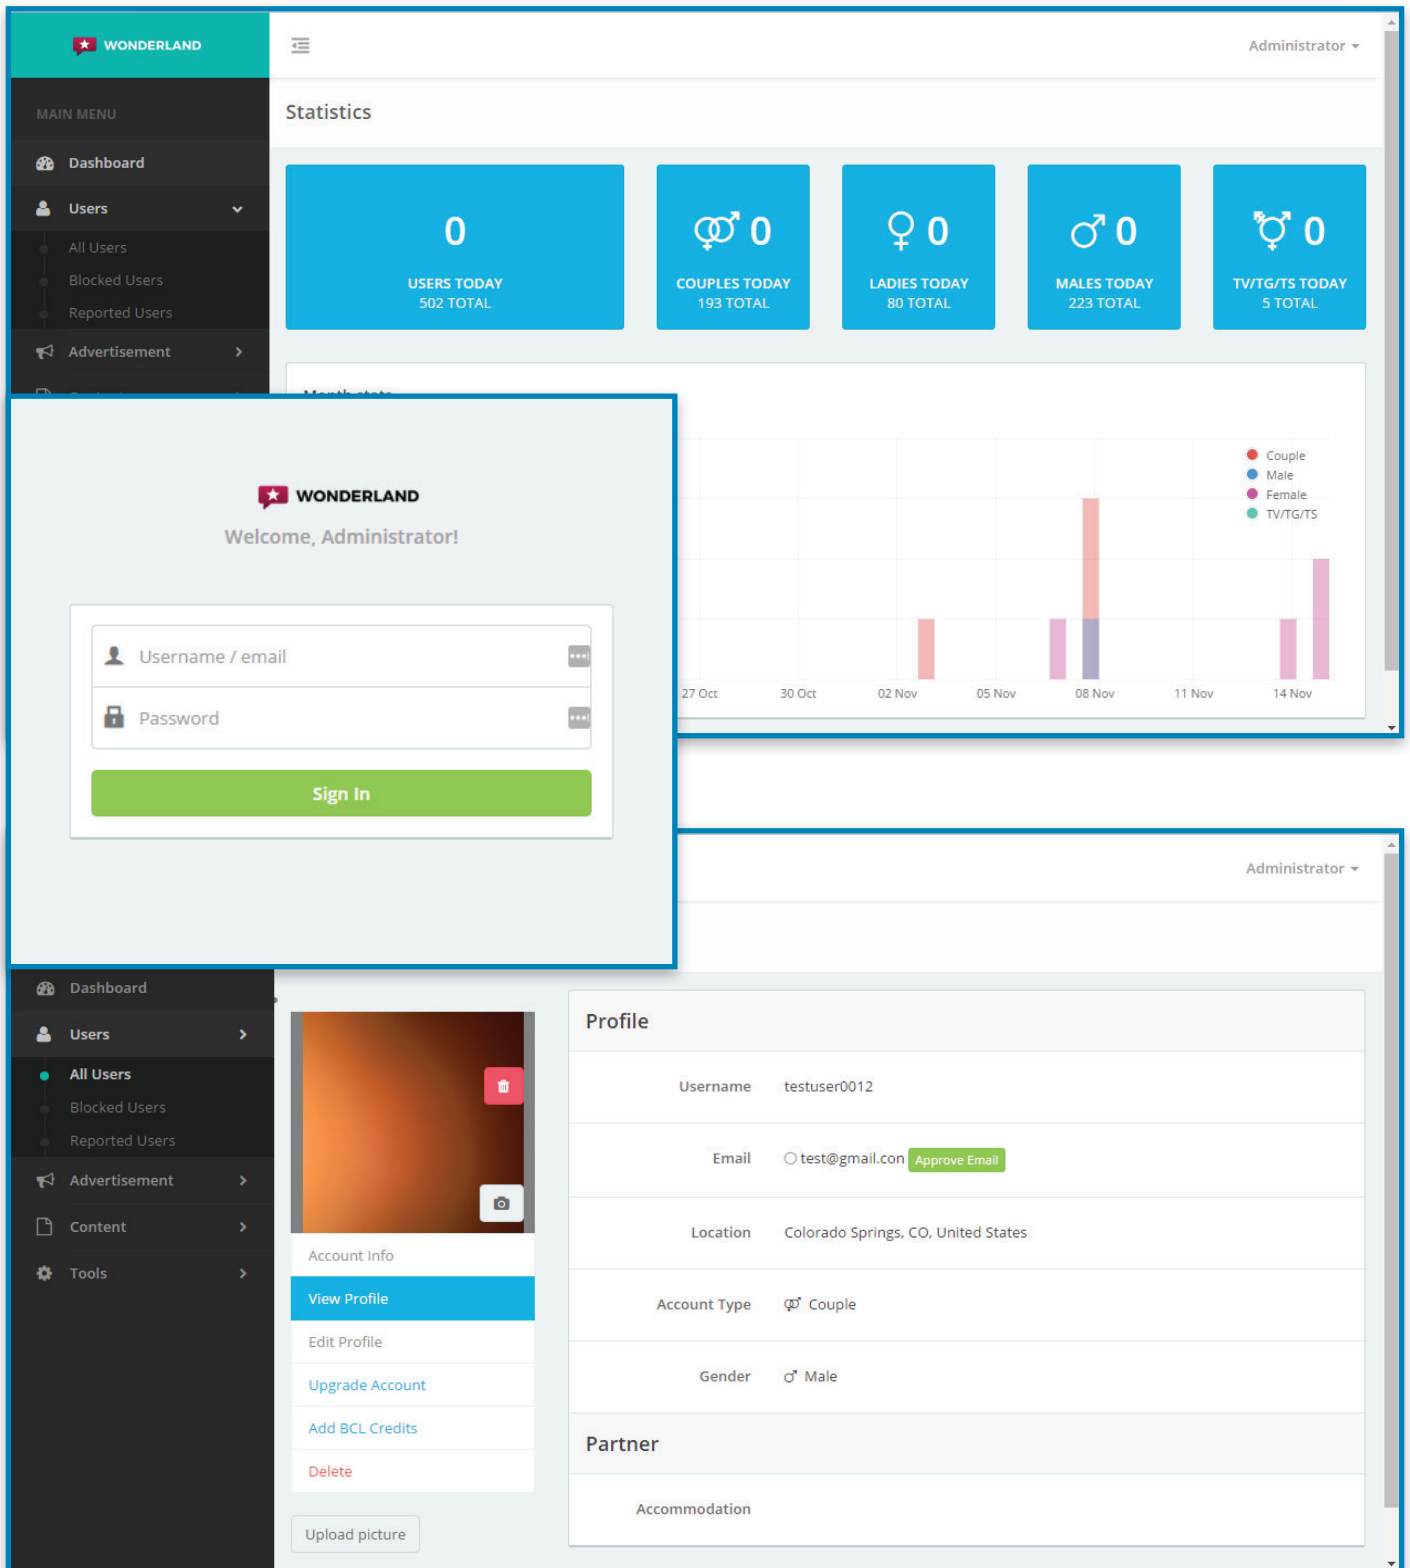

WONDERLAND

[HTTP://WONDERLANDDATECLUB.INFO/](http://wonderlanddateclub.info/)

User management admin panel, backend API changes and updates.

Technologies used: PHP, Twig, Klein.PHP, Composer, SASS, Gulp

Key responsibilities: Create native PHP admin web application for user management

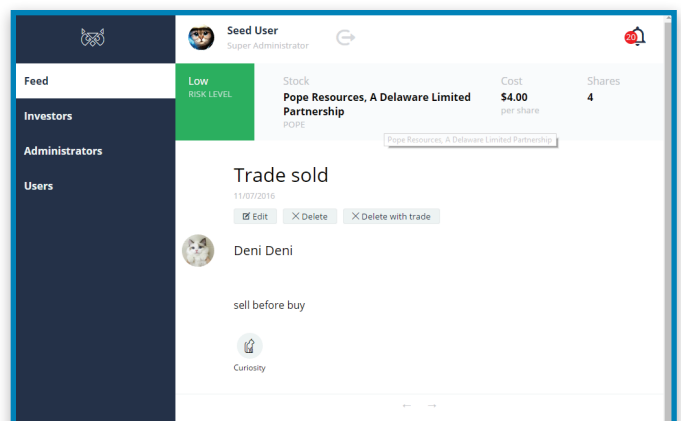

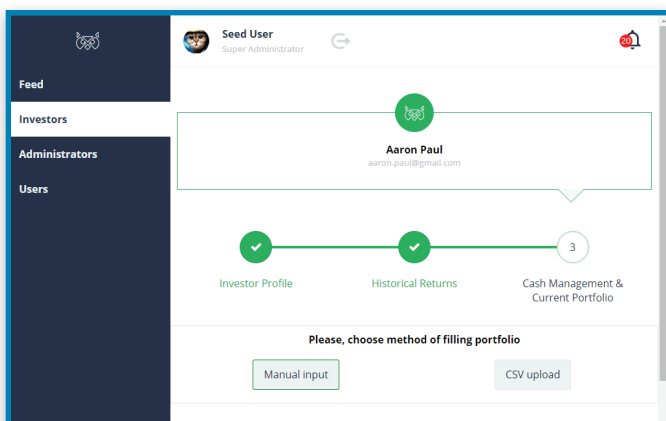

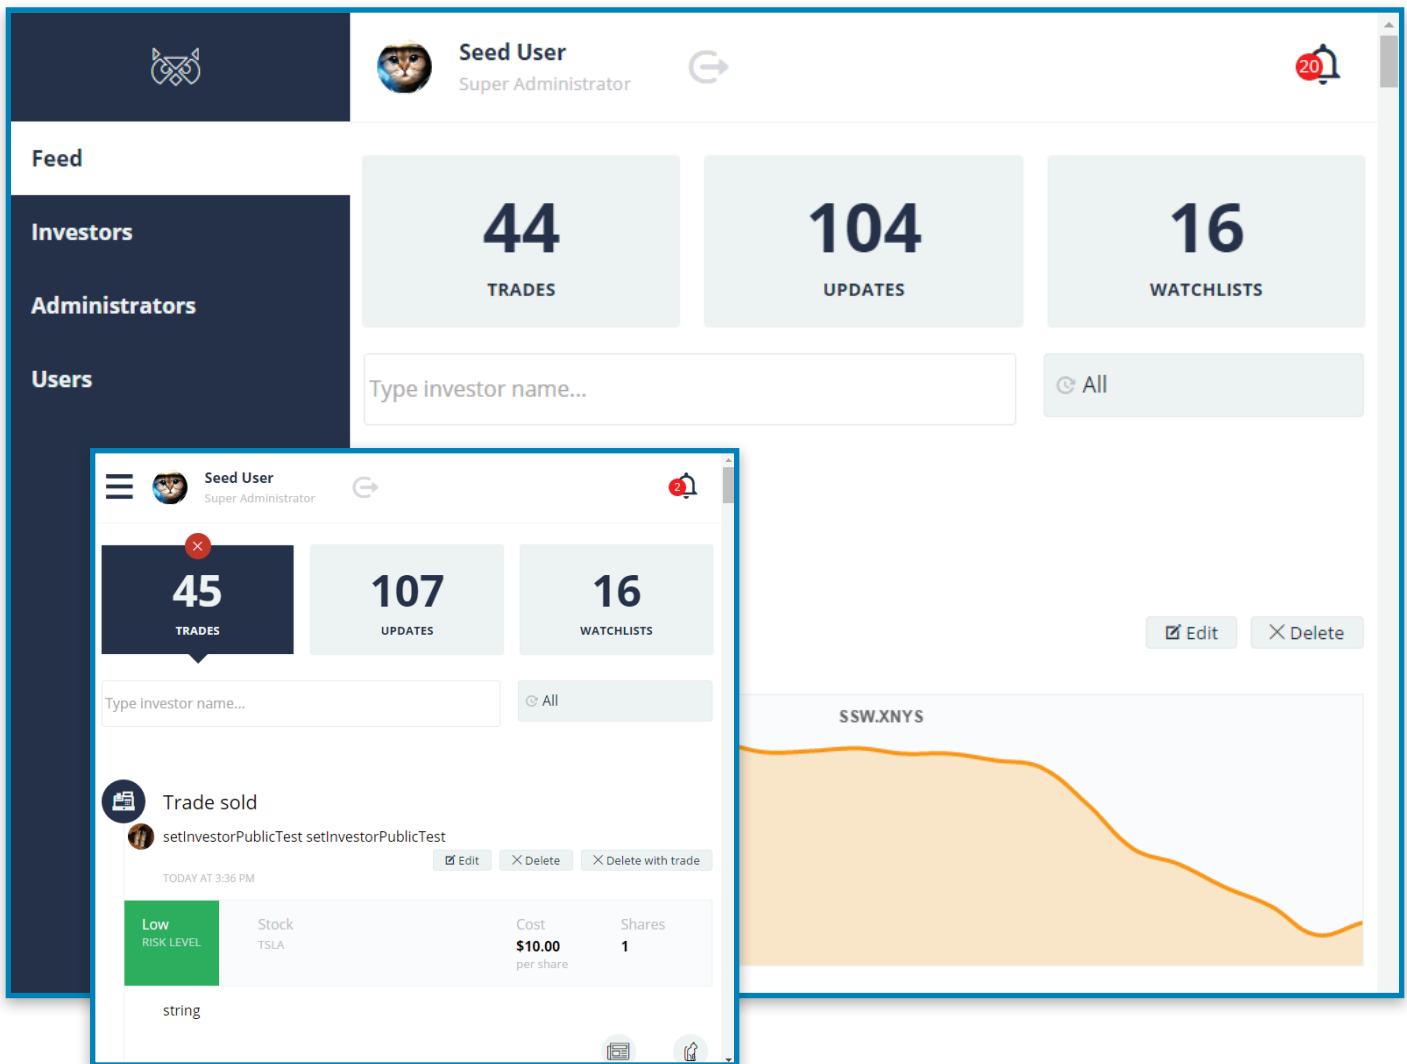

NETVEST

[HTTPS://NETVEST.COM](https://netvest.com)

Web application managing investors and users profiles for mobile app.

Technologies used: Angular2, TypeScript, ES6, SASS, TSLint, Gulp, Webpack.

Key responsibilities: Create Angular2 components, templates, controllers, services working with REST API. Develop custom responsive UI design based on flexbox.

[HTTPS://DISTILLERY.COM](https://distillery.com)

Technologies used: Wordpress, Gulp, HubSpot, LESS, Docker, Composer, Zeplin

The image shows the hero section of the Distillery website. At the top left is the Distillery logo with the tagline "Business clarity. Software craft." To the right is a navigation bar with links: "OUR WORK", "ENGINEERS", "PRODUCT DEVELOPMENT", "ABOUT US", "BLOG", and a "CONTACT" button. The main heading reads "DISTILLERY IS A FULL-SERVICE SOFTWARE DESIGN AND DEVELOPMENT COMPANY." Below this is a subheading "We've been featured by Apple, built mobile apps with millions of downloads, and have taken startups to large successful exits." At the bottom left is a "OUR SERVICES" button. On the bottom right, there is a screenshot of a terminal window showing a file explorer with folders like "content/themes/distillery_blog" and "import", and a list of files including "fix_subscribe_field_missing" and "Settings Import".

content/themes/distillery_blog	fix subscribe field missing
import	Settings Import
.gitignore	Settings Import
composer.json	Widget CSS optimized,
composer.lock	Widget CSS optimized,
index.php	Settings Import
wp-config.default.php	Fixed DB-643 Add padding
wp-config.development.php	Settings Import
wp-config.env.php	DB-672
wp-config.php	Settings Import
wp-config.production.php	Settings Import
wp-config.staging.php	Settings Import

Business clarity. Software craft.

[HTTP://RAYZRU.GITHUB.IO/EVENT-PARSER/](http://rayzru.github.io/event-parser/)

Native JS library parses events written in plain English, and returns an object defining a event

Technologies used: Native JavaScript, ESLint, Karma,

Key responsibilities: Create unattended javascript library with some magic u can test at [demo page](#).

Test

Test event tomorrow at 6 pm

```
{
  "title": "Test event",
  "startDate": "2016-11-17T18:00:00+03:00",
  "allDay": false,
  "isRecurrent": false
}
```

event-parser.js

Parses events written in plain English, and returns an object defining a event

[View on GitHub](#)

[Download .zip](#)

[Download .tar.gz](#)

Usage

```
var event = 'Pick up Dave on 6 of January at 6pm'.parseEvent({

  // Options

  // callback called after parse is done;
  onParsed: function() {},

  // callback called after each instance of date is parsed;
  onDateParsed: function () {},

  // callback called after each instance of time is parsed;
  onTimeParsed: function () {}

});
```

WINSKINS

[HTTP://WINSKINS.ME](http://winskings.me)

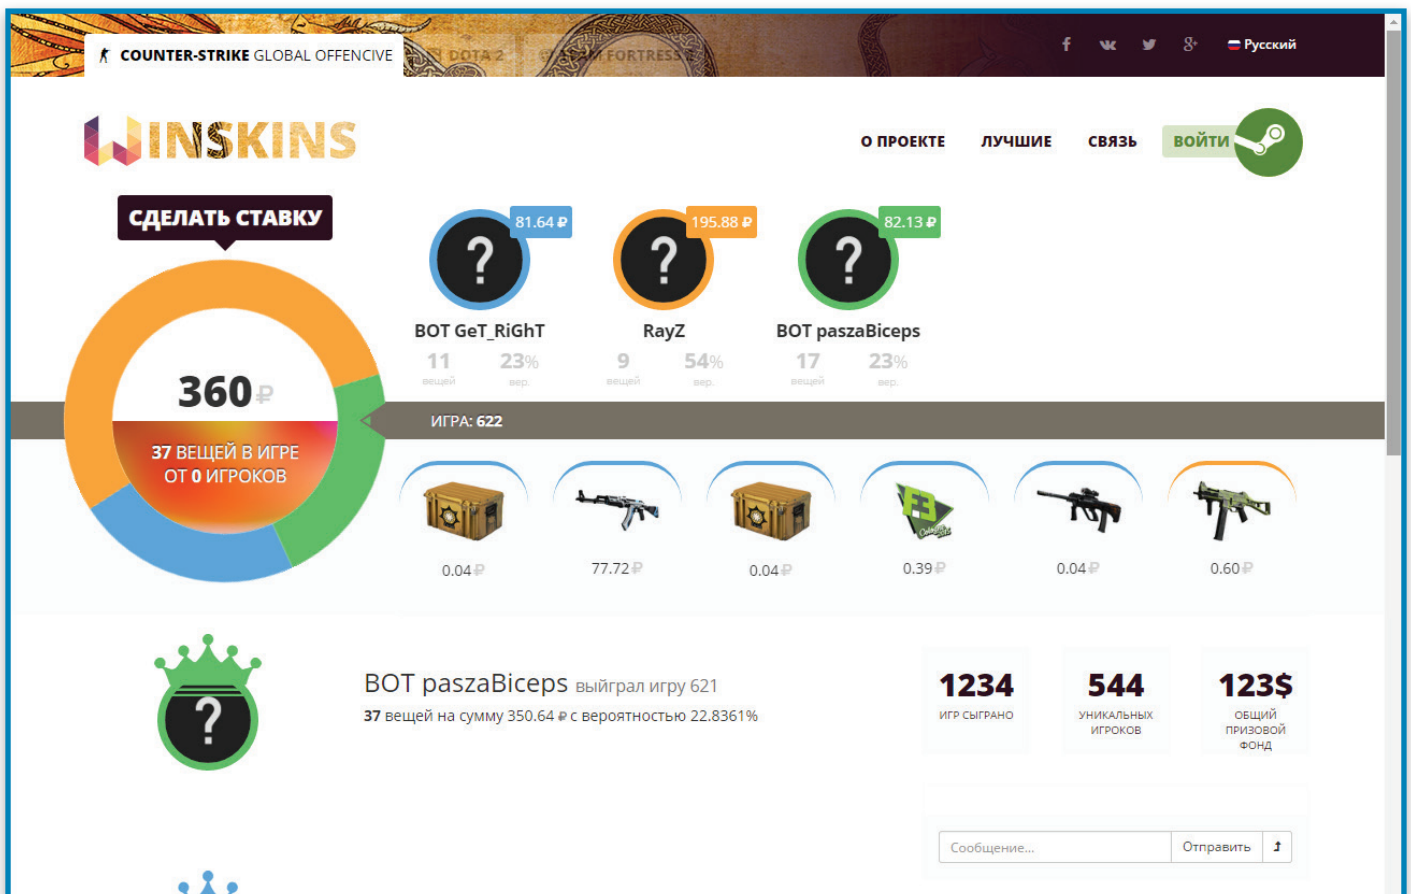

CLOSED

Online betting service with Counter-Strike:Global Offensive inventory items.

Technologies used: Native JavaScript, jQuery, Backbone.js, RivetsJS, PHP. YII2, Socket.io, underscore

Key responsibilities: Create single-page web application for betting inventory items from CS:GO game.

[DEMO ROLL](#)

ODISSEY

[HTTP://ODISEY.RU](http://odisey.ru)

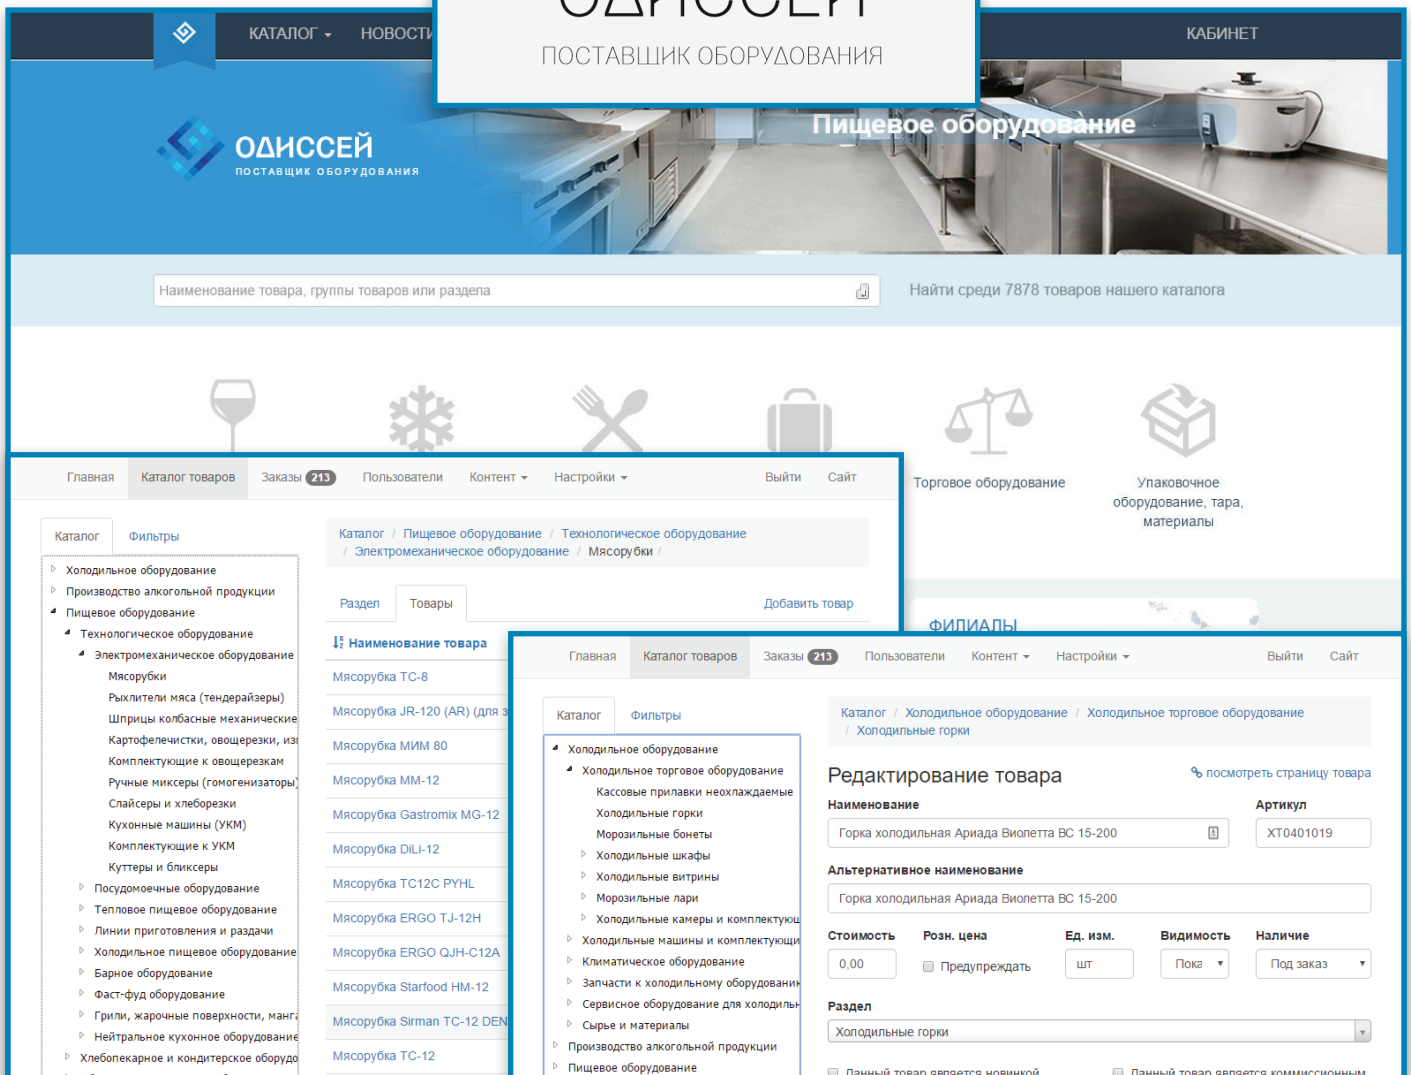

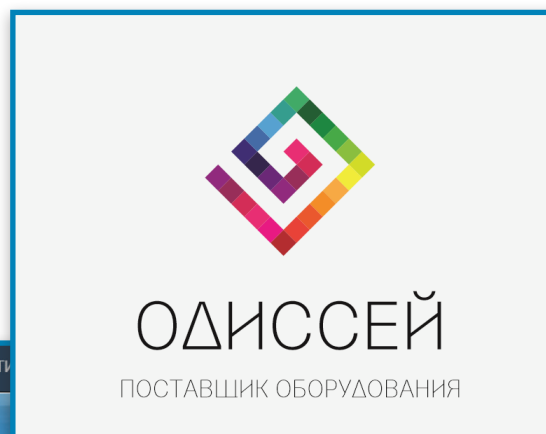

JAN 2012 - TODAY

Online retail shop catalog

Technologies used: Bootstrap, jQuery, PHP, SCSS, nginx, apache2, MySQL, memcache, SEO

Key responsibilities: Develop fully-supportable PHP web-site from scratch. with full-driven content and catalog management tool.

Create new logo concept.
